Why is NSG launching a new solar glass production line?

January 2025: NSG Group has commenced operations of a new solar glass production line in the United States, strengthening its position in the solar photovoltaic glass market. This development is expected to enhance the supply of high-quality solar glass, supporting the growing demand in the renewable energy sector.

Are anti-reflective coatings the future of Solar Photovoltaic Glass?

In 2024, anti-reflective coatings commanded 57% of the solar photovoltaic glass market, supported by entrenched float infrastructure and proven light-capture gains. The segment's dominance is reinforced by standardized recipes and high yields, especially for commodity mono-perc modules.

Should Solar Photovoltaic Glass be used in a park?

Utility-scale parks remain central to climate-policy targets, with developers favoring large-format glass to reduce balance-of-system cost per watt. The solar photovoltaic glass market share thus skews toward heavy-duty tempered panels that tolerate extreme wind and sand.

Illuminate USA is taking U.S. solar manufacturing to the next level with a landmark five-year deal to source high-performance, American-made solar glass from SOLARCYCLE.

Learn how transparent solar windows and BIPV facades are powering U.S. buildings in 2025--turning glass into clean energy generators without rooftop panels.

According to Vitro officials, the expansion is backed by a \$67.6 million investment tax credit allocation from the Internal Revenue Service. The funding will help establish a new ...

This pilot production marks a significant step toward enabling the glass industry to produce full-scale vision area glass for clean, solar energy-producing facades.

Illuminate USA is taking U.S. solar manufacturing to the next level with a landmark five-year deal to source high-performance, ...

This pilot production marks a significant step toward enabling the glass industry to produce full-scale vision area glass for clean, solar ...

January 2025: NSG Group has commenced operations of a new solar glass production line in the United States, strengthening its ...

The solar glass industry stands at the cusp of a remarkable transformation as we approach 2025. This specialized glass, engineered to maximize solar energy transmission ...

In 2025, North America accounted for a 42.9% share of the global Solar PV Glass market, valued at USD 3.6 billion, making it the second-largest regional market.

SOLARCYCLE and Arizona State University built a solar panel with 50% recycled glass, and it performed just like a new one.

Next Energy Technologies, a California-based company, has recently announced an innovative breakthrough in the world of solar ...

Next Energy Technologies, a California-based company, has recently announced an innovative breakthrough in the world of solar energy with the unveiling of what they claim to ...
