The innovative and mobile solar container contains 200 photovoltaic modules with a maximum nominal output of 134 kWp and, thanks to the lightweight and environmentally friendly ...

It's designed to be foldable, integrated for fast deployment anywhere. Just lay the track, pull it gently, and the solar panels will be deployed. Start working efficiently, keeping up ...

The mobile solar containers and portable solar chargers are designed with easily foldable solar panels which makes them ideal for remote areas and versatile applications like mining, ...

The solarfold Container is an immaculately-detailed and sophisticated plug & play system for a wide range of applications. The mobile drive system consists of a flexible drive unit mounted ...

While traditional stationary solar power systems are normally cumbersome to install and difficult to relocate, folding PV containers make ...

While traditional stationary solar power systems are normally cumbersome to install and difficult to relocate, folding PV containers make use of innovative articulated panels ...

Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks to a sophisticated rail ...

These panels usually use high-efficiency thin-film solar technology, which is light, flexible and easy to fold. The panels can be folded inside the container for easy transportation ...

output of 134 kWp and, thanks to the lightweight ...

We offer two types of solar containers that differ in design and power output. Besides our flagship, auto-foldable container, we also offer the manual version of this unit.

These panels usually use high-efficiency thin-film solar technology, which is light, flexible and easy to fold. The panels can be ...

The solarfold Container is an immaculately-detailed and sophisticated plug & play system for a wide range of applications. The mobile drive system ...
