What is a PPA for new energy storage resources?

Some PPAs for new energy storage resources have been structured as capacity-only contracts in which the developer is responsible for the sale of energy and all costs associated therewith--including the costs of the required energy procured from the utility.

Why did EPA develop a solar RFP document checklist?

EPA developed a solar RFP document checklist to keep track of key components, such as scope and deliverables, specific requirements, and RFP submission process and key dates.

How do energy storage contracts work?

For standalone energy storage contracts, these are typically structured with a fixed monthly capacity payment plus some variable cost per megawatt hour (MWh) of throughput. For a combined renewables-plus-storage project, it may be structured with an energy-only price in lieu of a fixed monthly capacity payment.

What are the challenges of procurement for utility-side storage & solar-plus projects?

The challenges of procurement for utility-side storage and solar-plus projects center largely on early-stage decisions: defining the top-priority use case, but also exploring ways to get more value out of the project and to prepare for market changes over its life.

Learn about the essential elements of a solar RFP; receive introductory guidance on how to evaluate any proposals received; and be directed towards tools, resources, and ...

A well-structured BESS procurement contract minimizes risks and ensures project success. By clearly defining technical specifications, payment terms, warranties, delivery timelines, testing ...
