Battery energy storage will be increasingly necessary to store power from renewable energy, like wind and solar, over the ...

The project will include two separate battery energy storage systems capable of charging from and discharging into the New York power grid and a solar canopy system ...

Battery energy storage will be increasingly necessary to store power from renewable energy, like wind and solar, over the coming years to create a more reliable electric grid that delivers clean ...

Ten years into its mission to green New York City's fossil fuel-dependent power mix, community-scale battery storage developer ...

Rows of secure battery units at a NineDot Energy site in Staten Island, designed to store clean power and support New York City's electric grid during peak demand.

We are the leading developer of community-scale battery energy storage systems (BESS) in the New York City metropolitan area.

A Brooklyn-based community-scale energy storage developer has secured sufficient funding to purchase almost 100 MW/400 MWh of battery energy storage systems ...

Rows of secure battery units at a NineDot Energy site in Staten Island, designed to store clean power and support New York City's ...

A Brooklyn-based community-scale energy storage developer has secured sufficient funding to purchase almost 100 MW/400 MWh of ...

Startup NineDot Energy is working on a third, medium-sized option, "community-scale battery storage" projects that can fit into less than an acre of open land or building space.

Battery energy storage is a critical piece of infrastructure that will strengthen the resilience and reliability of the New York City electricity grid as it transitions to a clean energy ...

Ten years into its mission to green New York City's fossil fuel-dependent power mix, community-scale battery storage developer NineDot Energy is itself a powerhouse, ...
