Europe is grappling with growing concerns over the cybersecurity risks posed by Chinese-made photovoltaic inverters, prompting discussions about restricting high-risk ...

LONDON, May 14 (Reuters) - U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters ...

Late last year, Estonia's spy chief Kaupo Rosin said that Chinese technology in critical infrastructure, particularly solar farms, could open Europe up to Chinese blackmail.

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within ...

Every solar panel and battery connected to the U.S. energy grid relies on a device few people ever consider: the power inverter.

US energy officials have found unexplained communication equipment inside some Chinese-made inverter devices, according to a report from the Reuters news agency. ...

For months, experts examining renewable energy equipment imported from China have been quietly finding rogue components in solar inverters and ...
