Does Azerbaijan have a role in energy security?

In this special edition of Energy Frontiers, we're in Baku for exclusive insights into Azerbaijan's evolving role in energy security, renewables, and its growing partnerships with Europe and beyond. The 11th Southern Gas Corridor and 3rd Green Energy Advisory Council meetings were held in Baku, bringing together representatives from 24 countries.

What is a base station in radio communications?

In radio communications, a base station is a wireless communications station installed at a fixed location and used to communicate as part of one of the following: a wireless telephone system such as cellular CDMA or GSM cell site. Base stations use RF power amplifiers (radio-frequency power amplifiers) to transmit and receive signals.

Will Azerbaijan expand gas delivery to Europe by 2027?

Azerbaijan's Energy Minister Parviz Shahbazov outlined plans to expand gas delivery to Europe and increase renewable capacity to over 33% by 2027. The EU's Energy Commissioner Dan Jørgensen reaffirmed Europe's aim to reduce reliance on Russian gas while supporting the energy transition.

What is a base station in a wireless network?

In the area of wireless computer networking, a base station is a radio receiver/transmitter that serves as the hub of the local wireless network, and may also be the gateway between a wired network and the wireless network. It typically consists of a low-power transmitter and wireless router.
