How to maintain a portable power station?

**Performance:** A clean exterior, working cables, and healthy battery are all critical factors in maintaining top-notch performance for your portable power station. **Safety:** Regular maintenance such as battery voltage testing, cable inspections, and secure connections are necessary to ensure the safe operation of your portable power station.

What happens if you leave a portable power station unused?

It's very common to forget about your portable power station, and leave it sitting unused in a closet or garage. If you do this for more than 12 months at a time, you risk severely damaging the machine over time, and significantly reducing the life of the battery. Here are a few reasons why regular maintenance is important.

How should a power station be stored?

**Store safely:** Store the power station in a cool, dry location elevated a few inches off the ground. Avoid exposing it to extreme heat, cold or humidity to prevent damage and corrosion. Consider using a protective case for added safety. **Use regularly, every 3-6 months:** The battery may lose its charge if the device isn't used for over 12 months.

Should you cover a power station?

Using a cover can help protect the unit from dust and accidental damage while in storage. Not the best conditions to store a power station in, even if it's water resistant! If you're not planning to use your power station for an extended period, charge it to around 50% capacity before storing it. This helps preserve the battery's health.

Even if your power station is rated as water-resistant, avoid using the main outlets if the unit is wet. Always ensure the device is ...

**DO NOT EXPOSE THIS PRODUCT TO RAIN OR MOISTURE.** Do you have a question about the 19A149978P1 and is the answer not in the manual?
