Where should battery back-up cabinets be installed?

In line-ups where battery back-up cabinets may be needed, the footprint location must be ascertained ahead of time because batteries cannot be added easily to side-by-side cabinets when battery back-up cabinets are in the center of a line-up. The battery cabinet must be installed adjacent to the power cabinet.

What are the minimum clearance requirements for a base station?

Minimum clearances must be maintained between the cabinets and surrounding building parts/cabinet to accommodate the installation and maintenance of the base station. The following constraints must be considered for cabinet clearances:

What is a cabinet system & how does it work?

The cabinets system supports network equipment, backup batteries, and power systems in a range of severe environmental conditions. 2 levels (Normal & Master) safety key mechanism completes the protection of installed equipment. | Thickness of steel: front doors: 2.0mm, roof: 2.5mm aluminum, other parts: 1.5mm.
