What is the Cape Verde electricity project?

The project consists in the design and construction of a set of inter-related electricity generation, network and storage components during the 2023-2029 period under Cape Verde's National Electricity Masterplan (2018-2040).

Where is the largest power station in Cape Verde?

The largest power station in Cape Verde is located in the City of Praia with an installed capacity of 31 MW.

What are the energy resources of Cape Verde?

Cape Verde has no primary energy resources except for wood, which is insufficient due to low rainfalls and poor soil quality. The country's energy supplies come from four main sources: petroleum products, butane gas, firewood, and wind.

Does Cabo Verde have electricity?

Access to electricity in Cabo Verde reached 93% in 2018 from 87.1% in 2012 though in rural areas access remains below the national average (83.1%). Renewable energy accounts for 20.3% of total supply and an electricity sector Master Plan (2018-2040) was designed to help achieve 50% of renewable energy generation by 2030.
