In November 2024, Chile's solar power generation capacity was projected to quadruple until 2060, in order to help decarbonize Chile's electricity generation. Energy storage will play a key role ...

According to Contour Global, they are constructing a solar energy storage plant named Victor Jara in the Tarapaca region, which is also supplied by BYD and is expected to ...

Grid constraints have prevented Chile from maximising the potential of its world-class solar resources. Energy storage has, therefore, ...

The project is located in Maria Elena municipality, in the Antofagasta region in Chile. It is expected to be one of the country's largest solar and storage projects once fully operational.

Grid constraints have prevented Chile from maximising the potential of its world-class solar resources. Energy storage has, therefore, become a necessity to ensure the ...

Smart integration features now allow multiple containers to operate as coordinated virtual power plants, increasing revenue potential by 25% through peak shaving and grid services.

Discover how Chile's rugged landscapes and renewable energy potential are driving innovation in outdoor power solutions for mining, agriculture, and emergency services.

Priority funding is directed toward integrated solar-plus-storage demonstration projects in the Atacama Desert, aiming to accelerate the energy transition in northern Chile. The Atacama ...

Discover how solar and storage projects by Zelestra are shaping Chile's grid, enhancing reliability, and driving Chile's energy transition.

According to Contour Global, they are constructing a solar energy storage plant named Victor Jara in the Tarapaca region, which is ...

Solar and energy storage deployment is booming in Chile, spurred on by supportive government policy that has been markedly stable for 15 years. Indeed, the nation leads Latin ...

Chile has reached fresh milestones in its energy transition amid a rapid build-out of solar and battery storage infrastructure. The context: The South American nation's brisk shift ...
