---

Cyprus has taken a step toward modernizing its energy infrastructure with the commissioning of a 3.3 MWh BESS as part of the Apollon PV Park. Operated by the University ...

By integrating a commercial battery energy storage system in Cyprus with solar panels, agricultural businesses can operate more sustainably, reduce overhead, and ensure ...

Cyprus will begin implementing renewable energy storage systems in 2026 at the earliest, Energy Minister George Papanastasiou announced during parliamentary discussions ...

Cyprus's isolated grid creates unique opportunities for battery owners. Unlike mainland Europe, we can't import cheaper power during peak demand, which means evening ...

Operated by the University of Cyprus, this is the country's largest battery project to date and the first of its kind at this scale. The BESS is integrated with a 5 MWp solar ...

In 2018, Germany's Autarsys commissioned a 75 kWh lithium-ion NCM battery system in Nicosia, Cyprus. This pilot project aimed to demonstrate the feasibility of scaling up grid-connected ...

The Cyprus Department of Environment has approved a significant battery investment for a 12 MW solar project, marking a key ...

The Energy Ministry is offering grants to help install battery systems with commercial and industrial solar power projects. The grants are part of Cyprus's broader plan to ...

The Energy Ministry is offering grants to help install battery systems with commercial and industrial solar power projects. The grants ...

The Cyprus Department of Environment has approved a significant battery investment for a 12 MW solar project, marking a key step in the country's transition to ...

An environmental impact assessment (EIA) has been submitted for a renewable energy project combining solar PV and energy storage on the Mediterranean island nation of Cyprus.

Currently, Cyprus has 125 MW of solar power capacity. The country aims to increase total renewable energy penetration in the electricity sector to 700-750 MW by 2023, primarily ...
