-----

From extending solar power to remote rural areas to significant investments in new solar parks, Colombia is positioning itself as a key player in the global solar energy market.

Colombia's solar power sector grew rapidly in 2024. Learn about key rooftop and community projects driving the nation's clean energy transition.

As of 2023, Colombia's renewable electricity generation capacity was 14.3 GW. Most of this capacity is hydropower. Solar power is growing fast, and in 2023 accounted for about 5% of the renewable capacity, up from almost zero five years earlier. The country has significant wind and solar resources that remain largely unexploited. According to a study by the World Bank's Energy Sector Management Assistance Program (ESMAP), exploiting the country's significant wind pot...

Colombia's national grid is getting stronger in 2025 with 17 new energy projects, mostly solar, boosting capacity and resilience. Discover how distributed generation, solar ...

By harnessing the country's vast solar potential, Colombia can provide power to rural communities, reduce its reliance on a single form of electricity generation, and lower ...

In Colombia, a growing movement is transforming rooftops into power generators. As electricity fees continue to climb, burdening families across the country, more and more ...

Colombia has set targets for diversifying its energy mix by incorporating wind, solar, and geothermal resources. The country announced a net zero target at the COP26, as well as a ...

Colombia's national grid is getting stronger in 2025 with 17 new energy projects, mostly solar, boosting

capacity and resilience. ...

Enel Colombia, the Colombian subsidiary of the Italian renewable energy group Enel Green Power, has begun commercial operations on its 370 MW Guayepo I& II solar plant, located in ...

Zero Emissions: Unlike fossil fuels, solar power generation doesn't release harmful greenhouse gases like carbon dioxide during operation. This significantly reduces Colombia's overall ...

With this project, Enel Colombia now operates four solar parks, including El Paso, La Loma, and Fundacion, with a total installed capacity of nearly 700 MWac, representing over ...

Colombia is approaching 2 GW of cumulative installed PV capacity, with 1.34 GW currently operational and an additional 700 MW in testing, according to the country's grid ...
