-----

With this facility, we find a novel concept of Cooperative communication that manages massive channels accessibility, heterogeneous networks, complex interference ...

With the rapid growth of heterogeneous fifth-generation (5G) communication networks and a surge in global mobile traffic, energy consumption in mobile network systems ...

This paper develops a method to consider the multi-objective cooperative optimization operation of 5G communication base stations and Active Distribution Network ...

1) Base Station Cooperation Experiment To test the effects of base station cooperation, we compared the case of not using base station #2 in Fig. 2 (no base station cooperation) and the ...

Fifth-generation mobile communication technology (5G) emerged in response to an explosion in global mobile data traffic, massive-scale device connections and various new ...

To deal with these issues, we developed millimeter-wave base station cooperation technology to enable multiple base stations to cooperate with each other while suppressing inter-mobile ...

5G is the fifth generation of cellular network technology and the successor to 4G. First deployed in 2019, [1] its technical standards are developed by the 3rd Generation Partnership Project ...

Kyocera is leveraging its proprietary, globally developed telecommunications and virtualization technologies to bring base station functionality to general-purpose servers using ...

To this extend, we find several strategies that discuss cooperative communication allocation techniques from

various technological aspects. This review paper compiles all such strategies ...

Our research addresses the critical intersection of communication and power systems in the era of advanced information technologies. We highlight the strategic importance of communication ...
