What type of communication system does China have?

The People's Republic of China possesses a diversified communications system that links all parts of the country by Internet, telephone, telegraph, radio, and television.

What telecommunication system did China have in 1987?

In 1987 China possessed a diversified telecommunications system that linked all parts of the country by telephone, telegraph, radio, and television.

Which telecommunication companies are based in China?

Such a clear shift does not occur in all countries, but the trend points in the same direction internationally. The two largest telecommunications providers based in China are China Telecom Beijing and China Tower Corp. in Beijing. China Telecom had a market capitalization of US\$63.94 billion in 2025, with total revenues of US\$72.42 billion.

When did China start telecommunications?

When the People's Republic was founded in 1949, the telecommunications systems and facilities in China first established by the Qing and Republican ITA and Ministry of Posts and Communications had been seriously damaged from over thirty years of on and off war between warlords, Japan, and the two sides of the Chinese Civil War.
