-----  
Is CPUC energy storage a good choice for non-residential projects?

Among all non-residential projects, Clusters 1, 2, and 3 yield relatively high energy value and associated GHG reduction value. Cluster 6 performs slightly worse due to its practice of night charging. The CPUC Energy Storage Procurement Study: Realized Benefits and Challenges highlights these findings in Chapter 2.

What is CPUC energy storage procurement study V Ancillary services?

Ancillary services in the CPUC Energy Storage Procurement Study provide grid operational flexibility and stabilization for reliable electricity delivery. CAISO ancillary services markets include non-spinning and spinning contingency reserves, and regulation up and down.

What is the CPUC Energy Storage Procurement Study?

The CPUC Energy Storage Procurement Study aims to improve data practices by addressing the lack of comprehensive and quality-controlled actual project characteristics and operational data across all resources and grid domains.

What type of energy storage projects are recent contracts for?

Recent contracts are predominantly for much larger transmission-connected energy storage projects. Earlier energy storage contracts were significantly more expensive across all grid domains, and they generally reflect the cost reductions seen in the global storage industry.

The Maryland Public Service Commission and the Maryland Energy Storage Initiative Workgroup have been working on a revised ...

The materials included are designed to give specific examples of the elements that should be included in a solicitation for the procurement and installation of a battery energy storage ...

This energy storage technical specification template is intended to provide a common reference guideline for different stakeholders involved in the development or deployment of energy ...

The Federal Energy Management Program's (FEMP) Distributed Energy and Energy Procurement initiative helps federal agencies accomplish their missions through investment in lasting and ...

By aligning tender structures with private sector risk tolerance and leveraging standardized checklists (e.g., DOE's procurement guidelines), governments can reduce bid ...

The Maryland Public Service Commission and the Maryland Energy Storage Initiative Workgroup have been working on a revised proposal to the Maryland Energy Storage ...

In evaluating the appropriate contract structures for the initial procurement of utility-scale energy storage resources, stakeholders provided insights on two primary mechanisms: indexed ...

Determine the types of storage to be considered. Grid carbon content varies throughout the day. Grid carbon content varies by region. Make and store chilled water (or ice) in tanks when ...

This chapter supports procurement of energy storage systems (ESS) and services, primarily through the development of procurement documents such as Requests for Proposal (RFPs), ...

Funded by President Biden's Bipartisan Infrastructure Law, these demonstration projects will increase community control of local power systems, mitigate risks associated with ...

Track and report total installation costs of customer-sited energy storage, using data collected through SGIP, for use in benefit/cost evaluations that consider the full spectrum of services ...
