How will the Gothenburg battery factory benefit the environment?

In a unique collaboration between the city and the battery factory, purified wastewater from Gothenburg residents will be used for cooling during production. The heated water will then be reused in the district heating network, benefiting both the environment and the city's residents.

Why are Sweden's oil refineries investing so much?

At the same time, other industries, both in Sweden and internationally, rely on their products for their production," says Hans Larsson, investment advisor for green tech at Business Region Göteborg. Most of Sweden's oil refining capacity is also located in Gothenburg and West Sweden. The refineries are investing heavily to lead the transition.

What's going on in Gothenburg?

Gothenburg is a hub for innovation and at the forefront of sustainable industry. Now a battery cluster is taking shape, characterised by something that has served the region well: collaboration. Near Volvo Car's production plant and new battery assembly factory in Torslanda, a gigafactory is under construction.

Summary: Gothenburg's new energy storage project addresses renewable energy challenges through cutting-edge battery systems. This article explores how this initiative supports ...

Chalmers and RISE Research Institutes of Sweden are behind the initiative, and at three different facilities - in Gothenburg, Nykvarn and ...

This article explores the project's technical breakthroughs, latest milestones, and how large-scale battery systems are transforming renewable energy integration.

We're building a first-of-its-kind R& D center and Li-ion battery Gigafactory in Gothenburg, Sweden, equipped with the expertise and technology to craft state-of ...

In the south-western part of the Hogsbo industrial area in Gothenburg, Stena Fastigheter and Ikano Bostad are planning for a new ...

Battery energy storage system operates to fulfill the energy grid stabilization requirements in Sweden.

Chalmers and RISE Research Institutes of Sweden are behind the initiative, and at three different facilities - in Gothenburg, Nykvarn and Boras - they are building knowledge ...

Construction of Novo Energy's battery factory in Torslanda is well underway, with production planned to begin in the latter half of 2026. ...

This article explores the role of manufacturers in Gothenburg--a hub for green technology--in developing cutting-edge power storage solutions that ensure reliability during outages and ...

Summary: Gothenburg's new wind and solar energy storage project aims to tackle renewable energy intermittency while supporting Sweden's 2030 carbon neutrality goals. This article ...

Summary: Explore how tailored energy storage cabinets address industrial needs in Gothenburg, Sweden. Discover trends, case studies, and why customization matters for sustainable ...

Construction of Novo Energy's battery factory in Torslanda is well underway, with production planned to begin in the latter half of 2026. The factory will produce custom batteries ...
