Is solar energy a solution to Syria's electricity crisis?

After more than thirteen years of war, Syria's electricity crisis has only deepened, compounding the suffering of its people. The former Assad government failed to secure stable energy supplies, and as shortages worsened and fuel prices soared, the regime turned to solar energy projects as an alternative, seeking to mitigate the crisis.

Is solar energy a viable option in Syria?

As the electricity crisis worsens, solar energy is no longer just an option - it has become an unavoidable necessity. Yet the high cost of installing photovoltaic systems has pushed many Syrians to rely on subsidized loans, particularly those provided by the Renewable Energy Support Fund, which offers interest-free financing.

Did Siemens buy equipment in Syria before Assad collapsed?

In minute 2 of the video, German-made electronic equipment from Siemens was visible, while later on in minutes 3, 9, and 30, machinery bearing the Mitsubishi Electric logo appeared--clear indications that sanctioned technology had been procured and installed in Syria before the collapse of the Assad regime.

By leveraging Syria's abundant solar irradiance, long sunny days, and vast desert land, this project provides a viable solution to meet ...

The former Assad government failed to secure stable energy supplies, and as shortages worsened and fuel prices soared, the regime turned to solar energy projects as an ...

Damascus Solar (???? ??? ???? ?????? ????????) is a shelved solar photovoltaic (PV) farm in Widyan al-Rabie, Rif-Dimashq, Syria.

Investment is beginning to return to the country with the lifting of U.S. sanctions, and major energy projects are planned, including an ...

Damascus launches a fixed-tariff scheme for 2-10 MW green power and signs a deal with 20Solar Energy to build twin 100-MW solar plants, one with battery storage. Syria ...

In early June 2025, it also entered into similar agreements with Solar Rex Company to build a 100 MW solar power plant and a 70 MW solar and storage project in the rural areas ...

The Syrian Ministry of Electricity has announced the construction of a 100-megawatt solar power station in the Damascus countryside, marking a major step toward ...

The former Assad government failed to secure stable energy supplies, and as shortages worsened and fuel prices soared, the regime ...

Investment is beginning to return to the country with the lifting of U.S. sanctions, and major energy projects are planned, including an industrial-scale solar farm that would secure ...

This article explores the development of wind and solar energy storage power stations in the region, their technical frameworks, and their role in stabilizing Syria's power grid. Discover ...

By leveraging Syria's abundant solar irradiance, long sunny days, and vast desert land, this project provides a viable solution to meet the growing energy demands of cities such ...

The solar power station, which would be based in the Damascus countryside, is part of a new investment opportunity designed to attract energy investors to finance, build, and ...
