Can a power bank charge a MacBook Pro Fast?

Yes, there are power banks that offer super fast charging, especially those with USB-C Power Delivery (PD) 3.0 or 3.1. Models like the Anker Prime 250W or Anker 737 (140W) can charge devices like a MacBook Pro or iPhone 15 incredibly fast--up to 50% in around 30 minutes.

Can I use a regular charging cable with a fast charging power bank?

Using a regular charging cable will not enable fast charging, regardless of the power bank's capabilities. To maximize performance, always check the compatibility of your devices and cables when using a fast charging power bank. How long does it typically take to charge a device with a fast charging power bank?

Do power banks charge faster?

Yes--some power banks charge much faster than others. It depends on their wattage output and whether they support modern charging standards like USB-C Power Delivery (PD). A 65W or 140W power bank, like Anker's offerings, will charge your devices significantly faster than a basic 18W model.

How long does a fast charging power bank take to charge?

The time it takes to charge a device with a fast charging power bank varies depending on several factors, including the power bank's output capacity, the device's battery size, and its current state of charge. Fast charging power banks can significantly reduce charging times compared to standard chargers.

That's where the latest power banks for fast charging come in. These aren't your average portable chargers. Today's top picks support USB Power Delivery (PD) 3.0 or 3.1, ...
