What happens if a product is discontinued by Vitro glass?

When a product is discontinued by Vitro Glass, the company creates a special inventory supply, sometimes referred to as "attic" stock. If you need more information on a discontinued product, please contact your Commercial Sales Representative or Architectural Representative. Solarban® 67 glass was renamed Solarban® R67 glass in January 2023.

Is Solarban XL the same as Solarban® 70xl?

The performance and visual characteristics of both glasses remain the same. In August 2019, Vitro Architectural Glass announced that it has changed the name of Solarban® 70XL solar control low-emissivity (low-e) glass to Solarban® 70 glass, formally dropping the "XL". Despite the name change, no changes were made to the glass formulation itself.

How does solar panel glass recycling work?

The recovered glass can then be melted down and manufactured into new solar panels, fiberglass products, or other glass items. This closed-loop approach significantly reduces the environmental footprint of solar energy by conserving raw materials and minimizing waste. How Does the Solar Panel Glass Recycling Process Work?

What is the global solar panel recycling market worth?

Recent analyses indicate the global solar panel recycling market was valued at approximately \$173 million in 2023 and is expected to grow to around \$471-478 million by 2030, representing a compound annual growth rate of 13-17%. As the industry expands, it generates diverse employment opportunities throughout the recycling process.

Know the future scenario, forecast, and current trends in solar photovoltaic glass.

(Yicai) Sept. 5 -- Major Chinese producers of photovoltaic glass confirmed that they are idling furnaces to reduce output in response to a severe supply glut, but industry insiders are unsure ...

As countries move toward decarbonization and grow the share of renewable energy in the total energy mix,

the commercial solar panel sector has seen both meteoric rises and ...

Starting April 30, 2025, Vitro Architectural Glass will no longer produce Solarban(R) low-e coatings on Atlantica(R) tinted glass. However, Atlantica(R) tinted glass will still be available in uncoated ...

Below is a list of discontinued solar panel brands. They introduced innovations, advanced manufacturing techniques, and expanded global awareness of solar energy solutions.

Evergreen Solar contributed to cost reduction initiatives and manufacturing process improvements. The list of discontinued solar panel brands is long and storied, ...

Vitro Architectural Glass is re-configuring one of its float lines in Carlisle, Pa., to produce solar panel glass for First Solar. The process will mean a temporary halt on the line ...

The list of discontinued solar panel brands is long and storied, featuring names such as Uni-Solar, HelioVolt, and Abound Solar, etc. Their stories offer valuable lessons on the importance of ...

Solar panel glass recycling is the process of recovering and repurposing glass materials from solar panels that have reached the end ...

At EK SOLAR"s Guangdong facility, this approach helped achieve: "92% operational efficiency through minimized cross-station travel - our glass substrates now move only 18 meters from ...

Solar panel glass recycling is the process of recovering and repurposing glass materials from solar panels that have reached the end of their operational life. When solar ...
