Focusing on Dresden as a Lead City, we explore the integration of 27 innovative solutions, including autonomous freight transport, eBuses, and charging robots, using a 5G ...

Projects that develop AI-tools as part of their research method are included.

This paper presents a European-wide techno-economic and environmental assessment of retrofitting 5G macro-cell base stations with grid-connected solar photovoltaic (PV) systems. ...

"To enable and demonstrate advanced Healthcare domain SGIs, such as telemedicine, leveraging the new 5G RAN infrastructure that will be ...

"To enable and demonstrate advanced Healthcare domain SGIs, such as telemedicine, leveraging the new 5G RAN infrastructure that will be implemented for different use case scenarios, static ...

Ericsson made a point of its green credentials at the recent Mobile World Congress, and launched a "green" base station design back in 2007. Its commitment extends from materials used in ...

The European research project ONE5G* focuses on boosting the capacity of mobile networks, improving their energy efficiency and enabling a variety of new vertical use cases in dense ...

The 6Green project aims to conceive, design, and realize an innovative service-based and holistic ecosystem, able to extend "the communication infrastructure into a sustainable, ...

The 6Green project aims to conceive, design, and realize an innovative service-based and holistic ecosystem, able to extend "the communication infrastructure into a ...
