StarCharge is advancing its European expansion with the signing of a 500-MWh order for its energy storage system (ESS) technology with US renewable energy investor ...

In Europe, the capacity of renewable energy sources is growing very rapidly, while traditional power plants are slowly being decommissioned. That's creating a unique new ...

This is a list of energy storage power plants worldwide, other than pumped hydro storage. Many individual energy storage plants augment electrical grids by capturing excess electrical energy ...

SERMATEC, recognized by BloombergNEF (BNEF) for its performance in energy storage, recently completed the grid connection of its commercial and industrial (C& I) energy storage ...

During the SNEC 2025 exhibition, Star Charge announced a strategic partnership with renewable energy investment company ENERGY INVESTMENT LLC to deploy 500 MWh ...

The project site was the home to a former gas power plant with potential subsurface voids and environmentally sensitive material. In order to avoid potential subsurface issues, the battery ...

Discover the current state of energy storage companies in Europe, learn about buying and selling energy storage projects, and find financing options on PF Nexus.

StarCharge is advancing its European expansion with the signing of a 500-MWh order for its energy storage system (ESS) ...

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project,

located on an industrial site on the East River in Astoria, Queens. ...

Energy storage systems are key for balancing supply and demand, ensuring grid stability, and improving energy efficiency. By offering real-time energy storage data, this tool ...

This is a list of energy storage power plants worldwide, other than pumped hydro storage. Many individual energy storage plants augment electrical grids by capturing excess electrical energy during periods of low demand and storing it in other forms until needed on an electrical grid. The energy is later converted back to its electrical form and returned to the grid as needed.

The company focuses on providing flexible, reliable systems that offer energy independence and security, especially during power outages, by integrating backup power functionality.
