Electrode materials with superior electrochemical behaviour must be developed to overcome these obstacles. The oxygen anion-intercalation mechanism leads to an interest in ...

Double perovskite oxides (POs) are effective electrode materials for supercapacitors (SCs). Nevertheless, adapting their unique architectures to boost the ...

Herein, a novel high-entropy double perovskite oxide (HEDPO), Pr_{0.2} La_{0.2} Nd_{0.2} Na_{0.2} Ca_{0.2} Ba_{0.5} Sr_{0.5} Co_{1.5} Fe_{0.5} ...

Perovskite fluorides for electrochemical energy storage and conversion: Structure, performance and mechanisms

Electrode materials with superior electrochemical behaviour must be developed to overcome these obstacles. The oxygen anion ...

The present review discusses about supercapacitor performance of perovskite oxides and metal halide perovskite materials. The trends in research has improved its energy ...

Double perovskite oxides (POs) are effective electrode materials for supercapacitors (SCs). Nevertheless, adapting their unique ...

Herein, a novel high-entropy double perovskite oxide (HEDPO), Pr_{0.2} La_{0.2} Nd_{0.2} Na_{0.2} Ca_{0.2} Ba_{0.5} Sr_{0.5} Co_{1.5} Fe_{0.5} O₅₊? (PLNNCBSCF), engineered to leverage ...

Metal halide perovskites (MHPs) have gained significant attention as a revolutionary class of materials in

photovoltaic technology, offering high power conversion efficiency, cost ...

In particular, transition metal perovskite fluoride (ABF_3) has emerged as a promising electrode material due to its excellent properties. This section reviews the ...

Perovskite-based nanostructures are used in supercapacitors and batteries for energy storage applications because of their large surface area, which facilitates effective ion ...

Herein, a new pseudocapacitive multiple perovskite fluorides (ABF_3) cathode is designed, represented by KMF - (IV, V, and VI; $M = NiCoMnZn/-Mg/-MgFe$), and constructed ...
