Why did a BGE power plant shut down?

This morning, a power plant that serves BGE customers experienced an unplanned disconnection from the BGE electric system. This was due to a transmission equipment issue impacting the BGE electric system. BGE continues to coordinate with the plant's owner to make repairs as quickly and safely as possible.

Why did Baltimore Gas & Electric lift a power outage warning?

(File photo) Baltimore Gas & Electric lifted the warning of the potential for widespread power outages Monday evening. Earlier, BGE had warned customers of a possible widespread outage because a power plant that serves BGE customers experienced "an unplanned disconnection from the BGE electric system," according to a news release.

Will BGE be able to save electricity during a power outage?

As such, BGE is asking all customers to immediately conserve electricity through Monday night. "Energy conservation helps reduce the potential for an outage," BGE said in a statement. "If an outage becomes necessary, we will make every effort to alert customers in advance."

How did BGE and PJM deal with a power outage?

BGE and PJM took measures to mitigate the potential for outages. BGE issued a call for conservation to customers. BGE also initiated emergency Peak Rewards and Connected Rewards cycling events. These efforts helped lower load and relieve strain on the grid, and have been lifted.
