Together, we showcase a co-engineering strategy of AI-empowered breeding to simultaneously optimize crop traits alongside the development of bespoke robotic technology.

La fièvre jaune est une maladie à tendance épidémique transmise à l'être humain par la piqûre de moustiques infectés et qui peut être évitée par la vaccination. Elle est due à ...

The journal covers a wide range of topics in chemical engineering, from fundamental principles to industrial

applications, including process design, optimization, and sustainability.

Genetic engineering refers to the intentional manipulation of genetic material, primarily DNA, to alter, repair, or enhance form or function. It involves techniques such as chemical splicing, ...

Yellow fever can present with a wide range of symptoms and severity. Once contracted, the yellow fever virus incubates in the body for 3-6 days. Many people do not ...

The emerging capabilities for engineering, such as the development of mega projects, unmanned intelligent systems, and cross-organization engineering collaboration, are ...
