-----

The world's smallest country just made a big move: Vatican City is now powered entirely by solar energy, setting an example for global climate action.

By installing solar panels in our 42 parish churches, the diocese will try to avoid 191 metric tons of carbon dioxide emissions over the next 25 years through the generation of ...

In a quiet corner of the Roman countryside, an ambitious project is taking shape--one that seeks not only to power the Vatican City entirely through renewable energy, ...

Vatican farm for use as a field of solar and becomes the world's first carbon-neutral state.

For this reason, Pope Francis ordered the construction of an dual-use solar plant in an extraterritorial area of the Vatican, which is expected to supply the entire Vatican City State.

Italy agreed Thursday to a Vatican plan to turn a 430-hectare (1,000-acre) field north of Rome, once the source of controversy between the two, into a vast solar farm.

Italy and the Holy See agreed to develop the 430-hectare Santa Maria Galeria site north of Rome into a solar farm designed to meet ...

In a quiet corner of the Roman countryside, an ambitious project is taking shape--one that seeks not only to power the Vatican City ...

This ambitious project, which has received approval from the Italian government, aims to generate sufficient electricity to fulfill the energy needs of Vatican City, aligning with ...
