The Port Authority of New York and New Jersey and Port Newark Container Terminals (PNCT), marked a milestone with the completion of one of the largest solar power ...

"By working hand-in-hand with PNCT and the city of Newark, our seaport is now home to a large solar energy project capable of generating significant energy for one of its ...

Abstract Port terminals, especially their reefer container yards, face surging power demands. Efficient reefer charging is critical for port sustainability and efficiency, as it helps ...

Abstract Port terminals, especially their reefer container yards, face surging power demands. Efficient reefer charging is critical for port ...

This paper investigates an integrated vehicle charging and operation scheduling problem in ACTs under fast charging technology, which aims to reduce charging cost and ...

High-powered fast charging technology could be the answer. Today's container terminals face continuous pressure to improve their performance and cost-efficiency, while ...

Electrification is emerging as a key strategy for decarbonisation of shore-side energy demand at ports. However, this electrification, particularly involving electric shore-side ...

At the Port Newark Container Terminal in New Jersey, solar panels have been shoehorned into a tightly packed, high-traffic shipping facility, without disrupting operations or ...

The Port Authority of New York and New Jersey and Port Newark Container Terminals (PNCT), marked a
