How will the 'lifeline' electricity subsidy work in Fiji?

Through the continuation of the 'Lifeline' electricity subsidy scheme, the Fijian Government will continue to support electricity access for the most disadvantaged members of society and continue to assess such schemes to ensure the greatest benefits in terms of social protection, poverty alleviation, and gender equality can be achieved.

Will Fiji be able to reduce emissions by 2030?

Includes a commitment to a 40 percent reduction in transport sector emissions by 2030. Fiji already has substantial renewable energy generation. Additional integration of variable renewable energy resources, such as solar and wind, would require a grid capable of managing real-time fluctuations in supply and demand caused by these technologies.

Can Fiji reshape its energy sector?

While this is no easy task, Fiji is blessed with abundant indigenous forms of renewable energy and is in the process of scaling up efforts to reshape its energy sector to address and satisfy changing energy demand parameters and requirements. [Jeffrey Betts, Unsplash](#)

How will Fiji support universal electricity access?

The Fijian Government will help support universal access to affordable electricity through a focus on policies and investments that create electricity access for the remaining 4.5% of the population that is without access to reliable sources of electricity via either on-grid or off-grid energy sources.

Fiji steps closer to its renewable energy goals with USTDA grant for a feasibility study that will support the development of up to 75 solar-powered mini-grids with energy storage providing ...

There's no denying that the Mamanuca islands are top contenders for Fiji's most picturesque region. But throw in a smattering of world-class resorts, frequent daily stress-free connections ...
