How much does a 20 kW solar system cost?

A 20 kW solar panel system is enough to power a large home--but it'll cost you about \$55,000. Why trust EnergySage? Installing a solar panel system can save you tens of thousands of dollars over time, but the upfront costs aren't exactly chump change.

How much electricity does a 20 kW solar system produce?

A 20 kW solar panel system produces about 29,033 kWh of electricity annually, but the exact amount depends on where you live and how much sun you get. DIYing a 20 kW solar panel system usually isn't your best bet: You're much better off hiring a professional solar company for optimal results. How much does a 20 kW solar system cost?

How big is a 20 kW solar system?

Most solar panels have a capacity of 300 watts. To achieve a 20kW solar system, you will need 67 or more panels. Each panel occupies approximately 17 square feet, resulting in a total footprint of 1133 square feet for a 20kW solar system.

Can a 20kW solar system save you money?

Investing in a 20kW solar system can lead to significant savings on your electricity bills. On average, a 20kW solar system can save you up to \$6,205 per year. Over the course of its 25-year panel lifetime, you could save a whopping \$155,125. The cost of electricity has been steadily increasing over the past 40 years.

Short version: From 2024, it costs between \$2,800 and \$5,500 to ship a 20-foot container of solar panels around the world, depending on origin, destination, fuel prices, and ...

Let's cut through the noise - solar pricing in 2025 behaves like a caffeinated kangaroo. A 20kW system today might cost anywhere between \$16,500 and \$49,000, but why the wild swing?
