How do you shut off a power supply?

To shut off the power to individual rooms or circuits, shut off the branch circuit breakers. If your home is equipped with an older fuse box, pull the main disconnect or pull out the fuse block to shut off the power to the house. Unscrew (counterclockwise) individual fuses to shut off individual circuits.

How do I Turn Off the power to my house?

Knowing how to turn off--and on--the power to your house is a fundamental safety practice that all families should learn. Briefly: To shut off the electrical power to your entire house, locate the main electrical panel (it pays to know where this is before you need it!) and flip the main circuit breakers at the top (usually a pair) to OFF.

How do you shut off electrical power?

Briefly: To shut off the electrical power to your entire house, locate the main electrical panel (it pays to know where this is before you need it!) and flip the main circuit breakers at the top (usually a pair) to OFF. To shut off the power to individual rooms or circuits, shut off the branch circuit breakers.

Should you cut off power before breaker box?

You might run into an accident because there remains a connection with the primary power source. So, to add confidence to your maintenance or repair activity, it's better to cut off the primary power source before your breaker panel.
