The legislation includes measures aimed at speeding up investments in the power grid to free up capacity for additional renewable energy projects. Ongoing investments in ...

Chile's energy storage boom is driven by the need to optimize intermittent renewable sources like solar and wind. By storing excess energy during peak production and ...

La compania ya suma mas de 5 GW en Latinoamerica. Su tecnologia de almacenamiento con grid forming ya opera en condiciones reales, incluso antes de que los ...

Storage project announcements are coming thick and fast as co-location with wind turbines offers cost efficiency and a smoother generation profile. Meanwhile, new capacity ...

The legislation includes measures aimed at speeding up investments in the power grid to free up capacity for additional renewable ...

The group has won a strategic project with operator Amprion to deploy five 50 MW batteries to ease pressure on the German power grid and optimise electricity transmission.

The project will have a capacity connected to the CGE grid of 1.5 megawatts (MW). The initiative will allow Huawei to focus on injecting energy into the system while contributing infrastructure ...

Chile is rapidly moving to build more power generation capacity, with much of that effort focused on renewable energy resources and ...

With transmission lines at overcapacity and permitting delays slowing the development of new grid
