---

Huawei has unveiled an EV charger that goes up to 1.5 MW today. It was rolled out in Shanghai, and Huawei claims it's the first fully ...

Today, Huawei launched a brand-new fully liquid-cooled 1.5 megawatt-class supercharger for EVs (electric vehicles). It is the ...

Huawei just revealed the results of rigorous testing for its liquid-cooled supercharging tech in the harsh Turpan region of China, known for its extreme temperatures.

Huawei just revealed the results of rigorous testing for its liquid-cooled supercharging tech in the harsh Turpan region of China, ...

Huawei liquid-cooled ultra fast charger solution delivers high-power EV charging with efficient thermal management, reliable performance, and scalable deployment.

The 1MW/4MWh all-vanadium liquid flow battery energy storage project built by Dehai Aike for Xizi Clean Energy has enabled Xizi Clean Energy's demonstration factory to achieve non-stop ...

A key technological innovation is the charger's immersive liquid cooling system. This design tackles the critical challenge of thermal runaway often associated with high-power ...

Huawei has unveiled an EV charger that goes up to 1.5 MW today. It was rolled out in Shanghai, and Huawei claims it's the first fully liquid-cooled MW-class charging solution.

The new charger, introduced in Shanghai, is designed primarily for heavy-duty electric trucks, though Huawei said it is also ...

The emergence of Huawei's 600kW Liquid-Cooled Ultra-Fast Charging pile is bound to accelerate the technology development and wide application of high-power liquid ...

Low, reducing equipment life. The fully liquid-cooled design makes it quieter during charging, and the wires do not need to be ...

The emergence of Huawei's 600kW Liquid-Cooled Ultra-Fast Charging pile is bound to accelerate the technology development and ...
