Does Iceland radio offer satellite communication?

Iceland Radio offers satellite communication service to aircrafts through IRIDIUM and IMMARSAT. When HF conditions deteriorate, a satellite communication can be applied. If the aircraft is equipped with a satellite phone on board, pilots can call Iceland Radio centre when necessary.

Where is Iceland radio located?

Iceland Radio is the aeronautical communication service provider in the Reykjavik FIR/CTA. It is the second largest in the world with an area of 5.2 million square km. Iceland Radio (Gufunes) communication centre is located in Grafarvogur, a suburb of Reykjavik, about 10 km NE of the city centre. Approximately 40 flight information officers (FIOs),

What frequencies does Iceland radio use?

From Iceland Radio, aeronautical communication service is provided every day for 24 hours through HF and VHF GP frequencies. VHF service is continuous over the North Atlantic Ocean with COM equipment located in Iceland, Greenland, and the Faroe Islands. Operating frequencies are VHF 126.550, VHF 127.850, and VHF 129.625.

What equipment does Iceland radio provide?

Communication equipment in various locations is the VCCS (voice communication control system). This system gives operators great flexibility and security in their work. Furthermore, Iceland Radio provides phone patch on request. The m
