Off-grid solar system with lithium batteries for any kind of buildings, anywhere in Indonesia. We can help make it more affordable!

In 2016, Millennium Challenge Account Indonesia (MCAI) and Akuo Energy jointly selected three villages in East Kalimantan to install hybrid minigrids that are powered by solar energy.

Using HOMER Pro software, six different scenarios were analyzed to optimize the PV panel size and battery storage capacity, with the objective of minimizing the levelized cost ...

To address these challenges, SUN Energy, the largest solar project developer in Indonesia, has introduced solar energy system solutions through an innovative financing ...

With unique geographical challenges, Solar PV Hybrid Systems are a practical solution for remote area electrification, in line with Indonesia's efforts to achieve more ...

Research on the design of a hybrid off-grid Solar Power Plant on Legundi Island has been successfully carried out. Based on the results of the calculations and analysis that have ...

With collaboration from the TML team, BOOSTESS delivered a 20ft containerized energy storage system featuring a 50 kW hybrid inverter and 1.5 MWh battery capacity.

China-headquartered battery manufacturer and energy storage solutions provider Elong Power announced this week (8 July) that it has entered a strategic cooperation ...

From island villages in Indonesia to rural schools in Vietnam, the projects indicate that mobile solar is not just

a stopgap measure--it is a long-term solution to energy poverty.

China-headquartered battery manufacturer and energy storage solutions provider Elong Power announced this week (8 July) that it has ...

With the successful deployment of this photovoltaic and energy storage system, the project not only paves the way for a greener future in Indonesia but also demonstrates the scalability of ...
