This is up from 2016, when renewable energy capacity represented seven per cent of total grid generation. Minister Vaz said the ...

Costly, imported fossil fuels are used to meet 90% of Jamaica's energy needs. Jamaica has set an ambitious target to generate 30% of its ...

Conduct technical and financial feasibility studies for solar, wind, and energy storage projects. Deliver risk assessments to ensure compliance with local and international ...

JPS owns the largest battery storage facility which generates up to 24.5MW of electricity. It cost the utility US\$27 million to install in ...

Investment in battery storage will help manage the intermittent nature of solar and wind, ensuring a reliable power supply. Innovations like floating solar and green hydrogen ...

primary energy supply. Energy trade includes all commodities in Chapter 27 of the armonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end

Under the project and with USAID support, JERA worked to strengthen the resilience of Jamaica's energy sector by accelerating the uptake of distributed solar ...

Jamaica's transition to adopting 50 per cent renewables is being guided by the updated Integrated Resource Plan (IRP-2), which was approved by Cabinet and published in ...

According to researchers Delmaria Richards and Helmut Yabar, Jamaica is unlikely to meet its ambitious
