Community members work together to install a solar panel on the rooftop of a village home. Before Sphere Solar installed the new panels, people from the village had to ...

Jackline Naiputa, leader of the Osopuka Edonyinap women's solar energy group, is one of many incredible Maasai women on the frontline of Kenya's solar revolution.

The Maasai Stoves & Solar Project of the International Collaborative designs and installs smoke-removing and efficient wood-burning chimney stoves and solar panel-based electrical systems ...

But these days, groups of Masai women are leading a renewable energy revolution. Hauling solar devices on donkeys from village to village, they're transforming the lives of locals with light and ...

Not so long ago, few remote Maasai villages in southern Kenya or northern Tanzania had access to electricity. But now, women in ...

For the eradication of poverty one of the most significant steps is to have a light switch and plenty of power every night, replacing the darkness and the need for open fires to see. Once the ...

Using a sociotechnical imaginaries approach, I analyze interviews, historical literature and other relevant documents to underscore how Maasai pastoralists are central innovating agents in a ...

Building on the strong relationships and design model that Tereneh has established, Idia'Dega and Land Art Generator embarked on a collaboration with OMWA to design culturally and ...

This project will place vented stoves into each home and install a solar micro-grid on the rooftop of one home in each village. The solar systems are put in place by trained Maasai women.

The solar energy drive began in around November 2014, and so far about 2,000 households in the country have adopted solar technology.

Not so long ago, few remote Maasai villages in southern Kenya or northern Tanzania had access to electricity. But now, women in these villages are championing the use ...
