Explore 10 renewable energy projects in the Middle East, showcasing solar, wind, and battery storage advancements set for 2025. Read more here.

It projects that MENA's solar capacity hit 24 GW (AC) in 2024, which would represent a 25% year-on-year increase. The report said that more than 80% of this growth ...

With coordinated policy, technological deployment, and regional collaboration, the Middle East can become a leading supplier of renewable power and clean fuels--supporting ...

The Middle East and North Africa (MENA) region is emerging as a global solar energy leader. With falling solar costs, government-backed clean energy strategies, and ...

The achievements in solar energy are further supported by ambitious government initiatives and policies aimed at accelerating renewable energy adoption. The report highlights record ...

Off-grid renewable energy solutions like solar home systems (SHS) and mini-grids have emerged as lifelines for remote, last-mile communities, bringing electricity access to low ...

Egypt's Benban Solar Park is a \$4 billion project in Aswan, comprising 41 solar power plants. One of the biggest solar photovoltaic parks in the world, it spans 37 square ...

Solar energy in the MENA region is gaining momentum, with policy reforms, giga-scale projects, and digitalisation driving growth--according to the MESIA Solar Outlook Report ...

The International Energy Agency (IEA) reports that solar PV, together with wind, could account for 95% of global renewable expansion by 2028.

The holistic solar project tracker covers 100+ number of under construction, announced/proposed, pre-construction solar PV projects across all countries of Middle East.
