To demonstrate this, MMC model performance is shown in an HVDC (High-voltage direct current) transmission application, one of the main application areas for MMCs. The model contains six ...

For MMC-HVDC we use a sorting algorithm, which switches submodules in a particular order to equalise their capacitor voltages, instead of using PWM. Figure: Full average equivalent.

The modular multilevel converter (MMC) is a reasonably young inverter technology with a promising future in medium voltage DC (MVdc) systems, such as large wind turbines in the DC ...

DC to AC Conversion (Inversion): When converting DC to AC (inverter mode), a DC voltage is applied to the converter's DC terminals. ...

DC to AC Conversion (Inversion): When converting DC to AC (inverter mode), a DC voltage is applied to the converter's DC terminals. The MMC uses the submodules to generate ...

Modular Multilevel Converters (MMCs) are a type of power electronic converter used for medium- and high-voltage direct current conversion, consisting of a multitude (up to several hundreds) ...

By controlling the switching of the sub-modules, the MMC can generate a near-sinusoidal output voltage with a very high number of voltage levels. This results in reduced ...

A multi-level converter (MLC) or (multi-level inverter) is a method of generating high-voltage wave-forms from lower-voltage components. MLC origins go back over a hundred years, when in the ...

By controlling the switching of the sub-modules, the MMC can generate a near-sinusoidal output voltage with a very high number of ...

Modular multilevel converter (MMC) is characterized by flexible expansion, high quality of output voltage waveform, low switching frequency, low system loss and so on. Because of these ...

In Siemens Energy HVDC PLUS systems, one modular multilevel converter comprises three Single-phase inverter. One converter comprises three identical phase units with two converter ...

Conventional control of a DC/AC MMC converter (3-phase, 9-level), also usable for other Modular Multilevel Converter topologies.
