Governor Kathy Hochul today announced nearly \$15 million in awards to four demonstration projects that advance long duration energy storage solutions that will help ...

New York Gov. Kathy Hochul, D, has issued nearly \$15 million in funding to four long-duration energy storage demonstration projects, the New York State Energy Research ...

A new iron-based aqueous flow battery shows promise for grid energy storage applications.

The power generation side and the power grid side will jointly verify the technical feasibility and engineering reliability of the sulfur-iron flow battery in large-scale energy storage.

The commissioning of this project marks a key leap for sulfur-iron flow battery technology from laboratory to engineering application, paving a new path for the development of long-duration ...

Lithium-sulfur (Li-S) batteries have been acknowledged as promising candidates for a new generation of energy-storage systems, owing to their superiority in high energy density ...

To that end, OE today announced several exciting developments including new funding opportunities for energy storage innovations and the upcoming dedication of a game ...

The 5-megawatt (MW) system will utilize sodium-sulfur technology to store energy for up to eight hours, Duke says - potentially doubling the duration of most commercially ...

Lithium-ion sulfur batteries as a new energy storage system with high capacity and enhanced safety have been emphasized, and their development has been summarized in this review.

New Energy Storage New Iron-Sulphur Project
