Is energy storage a good investment in Poland?

In Poland, interest in energy storage investment has been evident for some time. Last year's main auction of the power market, with capacity delivery for 2029, further bumped up the capacity of storage projects.

Should US companies offer battery energy storage systems in Poland?

U.S. Commercial Service recommends that U.S. companies offering battery energy storage systems take a hard look at the Polish market because there will be opportunities for U.S. companies to propose their solutions for many years to come. For more information, please contact Commercial Service Poland at office.warsaw@trade.gov.

Does Poland have a new energy storage subsidy programme?

The energy storage sector in Poland showed significant momentum even before the launch of this new subsidy programme. Through power market auctions for 2021-2028 and supplementary auctions for 2021-2025, contracts for energy storage with a total capacity of 9.5 GW were already wrapped up.

What is Poland's new energy storage scheme?

The scheme has been brewing since 2024, with the final regulation published in the Journal of Laws of the Republic of Poland in March this year. It received European Commission approval, which authorised state aid of EUR1.2 billion in state aid to support at least 5.4 GWh of new electricity storage facilities.

Poland, formally the Republic of Poland (Polska, Rzeczpospolita Polska), is a country in Central Europe, stretching from the Carpathian and Sudeten Mountains to the Baltic Sea.
