Solar power in the United States Solar panels on a rooftop in New York City Community solar farm in the town of Wheatland, Wisconsin [1] Solar power includes solar farms as well as local ...

solar industry installed 10.8 GW of new electricity generating capacity in Q1 2025, according to the U.S. Solar Market Insight Q2 2025 report released today by the ...

More than 17 gigawatts of new power capacity went online in the fourth quarter of 2024 and most (95%) of this capacity was renewable. ...

About this data Total solar capacity Total solar (on- and off-grid) electricity installed capacity, measured in gigawatts. This includes ...

Each quarter, the National Renewable Energy Laboratory conducts the Quarterly Solar Industry Update, a presentation of technical ...

Photovoltaic (PV) solar accounted for 56% of all new electricity-generating capacity additions in the first half of 2025, remaining the dominant form of new electricity-generating ...

In 2024, between 554 GWdc and 602 GWdc of PV were added globally, bringing the cumulative installed capacity to 2.2 TWdc. China continued to dominate the global market, ...

Each quarter, the National Renewable Energy Laboratory conducts the Quarterly Solar Industry Update, a presentation of technical trends within the solar industry.

US Solar Market Insight is a quarterly publication of Wood Mackenzie and the Solar Energy Industries
