-----

The Low-cost Earth-abundant Na-ion Storage consortium is a major effort to create superior, no-compromise batteries that replace lithium with inexpensive, domestically ...

Peak Energy designs and deploys next-gen sodium-ion energy storage that is safer, lower-cost, and more reliable. Our systems remove legacy failure ...

Peak Energy designs and deploys next-gen sodium-ion energy storage that is safer, lower-cost, and more reliable. Our systems remove legacy failure points and enable rapid grid growth to ...

Peak Energy debuts the US's first grid-scale sodium-ion battery, cutting costs and boosting reliability with passive cooling tech.

This technology strategy assessment on sodium batteries, released as part of the Long-Duration Storage Shot, contains the findings from the Storage Innovations (SI) 2030 strategic initiative.

In an energy storage market where safety, cost, and domestic supply chain resilience are fast becoming competitive levers, this design pivot positions Peak Energy as an ...

While sodium-ion batteries are not yet ready to replace lithium-ion for long-range EVs due to lower energy density, several companies (e.g., CATL, Faradion) are exploring ...

This project focuses on improving the performance, lifespan, and safety of sodium-ion batteries, making them suitable for large-scale energy storage applications.

Sodium-ion battery storage startup Peak Energy has announced its first shipment of its system that will be
