Why should you install solar panels?

Generate your own clean energy from the sun for free with solar. Add Powerwall to store your energy for use anytime you need it. Flexible financing and low monthly lease options can help you secure the best price for your solar system. By installing solar panels, you can also reduce your reliance on traditional energy sources.

How do solar panels work?

Rail-free mounting keeps panels close to your roof and panel skirts hide hardware and edges from view. Solar panels generate energy from sunlight for you to use in your home. When paired with a Powerwall home battery, you can store your excess energy for use whenever you want.

Why should you install solar with Powerwall?

When you install solar with Powerwall, the Tesla app gives you control over all the products in your Tesla ecosystem. Decide if you want to optimize your generated energy for savings, backup protection--or both. See how much energy your system is generating, how it's being used and how much it's helping you save.
