Is Hamburg a leader in urban green roof projects?

Hamburg is a leader in the implementation of urban green roof projects. Find out about funding, scale, and Hamburg's most ambitious green roof project - the soon-to-be-constructed rooftop gardens on the St. Pauli Bunker.

Will Hamburg have green roofs?

Plans for an elaborate network of green areas on top of the grey ramparts were ratified in 2017. When it comes to green roofs, Hamburg has taken a leading role among major German and European cities: no less than 70% of all suitable rooftops are to be topped with vegetation.

Does Germany have a good solar system?

This happens when newly installed capacity on existing buildings is included in the market data register. Germany's average solar factor is 70 percent, according to Lichtblick, with 12 out of the 14 cities analysed, including Berlin and Hamburg, improving their performance compared to last year. Bremen in the north and southern Nuremberg did worse.

Should solar panels be mandatory in Germany?

The German government is targeting a total solar power capacity of 215 GW by 2030. LichtBlick called for nationwide, uniform rules making roof-top solar panels mandatory.
