InfoLink Consulting has released its 1Q25 global energy storage system (ESS) shipment ranking, based on its energy storage supply chain database.

Despite the short-term disruptions caused by geopolitical and other factors, InfoLink expects system shipments to exceed 300GWh in 2025, driven by the rigid demand of ...

According to InfoLink's Global Energy Storage Supply Chain Database, global energy storage cell shipments totaled 240.21 GWh in 1H25, up 106.1% YoY.

The Asia-Pacific region accounts for 54% of global ESS shipments, driven by China's 400GW national storage target. But here's the kicker - North American vendors lead in profit per ...

Solar panels, inverters, and battery systems are often large, fragile, and expensive to ship. Poorly optimized freight solutions can increase costs by 15-25% per shipment.

Anza reports on U.S.-made solar modules, cells and battery energy storage in today's pipeline and offers a glimpse at manufacturers" ...

Discover our range of innovative solar panels on shipping container products engineered to meet your renewable energy needs with maximum efficiency and reliability.

In Q1 2025, China's market showed steady growth, the U.S. market saw front-loaded shipments, and emerging markets gained momentum, ...

According to InfoLink's global lithium-ion battery supply chain database, energy storage cell shipments reached 202.3 GWh in the first three quarters of 2024, up 42.8% YoY.

In Q1 2025, China's market showed steady growth, the U.S. market saw front-loaded shipments, and emerging markets gained momentum, driving global energy storage system shipments to ...

PCS shipments to front-of-the-meter (FTM) energy storage siting accounted for over 50% of total global shipments over the forecast period (2023-30), with the United States and China ...

Anza reports on U.S.-made solar modules, cells and battery energy storage in today's pipeline and offers a glimpse at manufacturers' efforts to ramp up production.
