What is a quarterly solar industry update?

Each quarter, the National Renewable Energy Laboratory conducts the Quarterly Solar Industry Update, a presentation of technical trends within the solar industry.

How did Canadian Solar perform in 3rd quarter?

"Third quarter revenue was at the high end of guidance, while gross margin exceeded expectations, supported by strong energy storage deliveries and a high mix of module shipments to profitable markets," said Dr. Shawn Qu, Chairman and CEO of Canadian Solar.

How many GW of storage are there in 2023?

03.8 GW of storage installed across all segments, 80% increase from Q3 2023  
o Residential installations hit all-time high

How much solar capacity did the US add in Q2?

Combined, solar and storage accounted for 82% of new capacity in the first half of the year. The US added 4.3 GW of solar module manufacturing capacity in Q2, bringing the total to 55.4 GW. However, there were no additions of upstream manufacturing capacity (polysilicon, wafer, or cell manufacturing).

Currently, Trina Solar's signed overseas energy storage order backlog exceeds 10 GWh, with these orders scheduled for concentrated ...

With a new wafer facility opening in Michigan in Q3, the United States can now produce every major component of the solar module supply chain. "We expect 250 gigawatts ...

The U.S. energy storage market achieved a new milestone in Q3 2024, driven by strong growth in grid-scale deployments.

Each presentation focuses on global and U.S. supply and demand, module and system price, investment trends and business ...
