Even the founders and an enthusiastic governor admit it sounds crazy: Charge up a train full of massive batteries with clean solar ...

PUEBLO, Colo. -- SunTrain, a San Francisco company, is designing a method to transport power by rail, moving containerized batteries between solar and wind farms in ...

As infrastructure struggles to keep pace with growing electricity demands, SunTrain proposes an innovative solution that leverages existing rail systems to transport ...

SunTrain stores green energy from remote solar and wind farms within customised battery containers that are transported over existing railroad networks. American railroads are ...

PUEBLO, Colo. -- SunTrain, a San Francisco company, is designing a method to transport power by rail, moving containerized ...

SunTrain charges LFPs with wind and solar energy and transports the fully charged batteries on a large train to locations where ...

SunTrain is hoping to ship renewable energy via battery-powered trains, charged from solar and wind, using rail networks.

Across the U.S., dozens of proposed solar, wind, and battery projects--encompassing thousands of gigawatts of potential power-- are ...
