UGE develops, owns, and operates community solar and energy storage projects. Our systems provide hosts and communities cheaper, cleaner, more reliable energy with no upfront cost.

Result TIMELINE realized. FIRST academic institution to utilize hybrid renewable energy solar and storage capabilities in CAISO.

TotalEnergies has been providing solar energy solutions to schools and educational facilities for nearly three decades, partnering with dozens of universities, community colleges and K-12 ...

To achieve new sustainability and climate resilience solutions, university campuses are installing multi-source test systems for analysing and improve energy solutions in order to ...

There has been a surge of solar energy implementation across the United States - leading the charge are major educational institutions like Oberlin College, the University of Florida, Texas ...

TotalEnergies has been providing solar energy solutions to schools and educational facilities for nearly three decades, partnering with dozens of ...

New Mexico State University's largest source of renewable energy--a 3 MW solar and battery energy storage installation called Aggie Power--has started generating power for ...

There has been a surge of solar energy implementation across the United States - leading the charge are major educational institutions like Oberlin ...

Students, faculty, and administrators across the country have taken major steps to drive clean energy adoption
