---

Q ENERGY, based in Berlin, has launched construction of a 44.5MWp solar photovoltaic (PV) plant in Teruel province, Spain. The project, located near Samper de ...

Energy service provider Q Energy has started construction on a 200MW solar PV portfolio in Spain. Consisting of three utility-scale projects - 105MWp, 73MWp and 26MWp, ...

It consists of five solar projects with a total installed capacity of 263 MW. This solar field will produce 515 GWh per year of renewable electricity, equivalent to the ...

Aquila Clean Energy, a leader in renewable energy development, has been authorised to construct five new solar PV plants across Spain. Located in Palencia, Cordoba, ...

Project developer Q Energy is planning to build three large solar power plants in Andalusia in southern Spain. The solar power can supply more than 92,000 households.

Q ENERGY is rapidly advancing the realisation of its photovoltaics (PV) pipeline in Spain and has started the construction of a further solar power project with a global capacity of ...

In just a few months, Spain has green lit more than 65 GW of solar projects that launched new hydrogen and battery storage pilots in order to increase its backing of global ...

It consists of five solar projects with a total installed capacity of 263 MW. This solar field will produce 515 GWh per year of renewable ...

The "Zaratan" project consists of three adjacent solar plants and will generate enough fossil-free electricity to supply nearly 50,000 Spanish households with green energy, ...

Q ENERGY continues to expand its presence in the north of Spain and started construction of a new photovoltaics (PV) plant in the province of Teruel. The project will ...

Aquila Clean Energy, a leader in renewable energy development, has been authorised to construct five new solar PV plants ...
