However, investment in solar and wind energy, as well as broader energy efficiency initiatives, remains negligible. Experts are urging international partners to revise their priorities ...

Tajikistan is embarking on a transformative energy initiative, planning to significantly increase its electricity capacity by 2030. The country has set an ambitious goal to ...

This hybrid system can take advantage of the complementary nature of solar and wind energy: solar panels produce more electricity during sunny days when the wind might not be ...

Distribution of wind potential Annual generation per unit of installed PV capacity (MWh/kWp) Wind power density at 100m height (W/m²)

The review comprehensively examines hybrid renewable energy systems that combine solar and wind energy technologies, focusing on their current challenges, ...

Currently, 18 investment projects totaling 1.5 billion US dollars are reportedly being implemented in the country. They are aimed at constructing large hydropower plants and ...

Tajikistan plans to generate up to 10% of its electricity from renewable sources such as solar and wind by 2030, the Minister of Energy and Water Resources of Tajikistan, Daler Juma, said, ...

Tajikistan plans to generate up to 10% of its electricity with renewable energy sources such as wind and solar, Energy and Water Resources Minister Daler Juma said at a ...

However, to enhance national energy security, Tajikistan aims to transform its role to an energy exporter,
