Is Tehran running out of water?

The government announced this week that many reservoirs, particularly those that supply the capital, Tehran, with drinking water, were drying out. Water supplies for Tehran are predicted to run out in just a few weeks, officials said, pleading with the public to reduce water consumption. A billboard in Tehran encouraging water conservation.

Why is water pressure so low in Tehran?

The Tehran Province Water and Wastewater Company announced this week it had reduced water pressure to such low levels that in Tehran -- a city of 10 million people, many living and working in high-rise buildings -- water could not flow above the second floor of apartment buildings.

Are Iran's water reservoirs drying out?

Iranians still recovering from a 12-day war with Israel and the United States last month must now confront life without the basics. The government announced this week that many reservoirs, particularly those that supply the capital, Tehran, with drinking water, were drying out.

Why is a billboard in Tehran encouraging water conservation?

A billboard in Tehran encouraging water conservation. "The water crisis is more serious than what is being talked about today, and if we do not make urgent decisions today, we will face a situation in the future that cannot be cured," President Masoud Pezeshkian said at a cabinet meeting on Monday, adding, "We cannot continue this way."

The Tehran project is one of 1,000 distributed solar plants planned under Iran's national 3,000-megawatt renewable energy initiative. The projects are being executed as ...

Iran's arid and semi-arid climate necessitates innovative strategies to address interlinked water and energy challenges. Floating solar photovoltaic (FSPV) systems offer a ...
